Archeological evidence in the
form of whale remains discovered
in burial mounds suggests that
whales have been consumed in
Japan since the JÅ•mon period
(between c. 14,000 and 300
BCE). Without the means to
engage in active whaling,
consumption at that time
primarily stemmed from stranded
whales. Surviving Ainu folklore
reveals a long history of whaling
and a spiritual association with
whales. Sat, 16 Jun 2018
