Both quantum and relativistic  
mechanics have Newtonian  
mechanics as its limit case (of  
large sizes and slow speeds).  
Within its range, Classical  
mechanics is most widely used,  
and if, in fact, one attempted to  
study the problem of, say,  
snooker ball movements using the  
full might of relativistic quantum  
mechanics, he would be  
hopelessly lost. Sun, 10 Jun 2018

class includes the opportunity for  
students to use the Personal  
Response System (PRS).  
Questions are posed to the class  
to stimulate discussion and  
indicate how concepts are going

over. Students "vote" on answers  
electronically and their answers  
are tallied. Mon, 11 Jun 2018

Physics Mechanics  
Physics is concerned with the  
basic principles of the Universe is  
one of the foundations on which  
the other sciences are based is  
typical experimental science  
The beauty of physics lies in the  
simplicity of its fundamental  
theories The theories are usually  
expressed in mathematical form  
Mechanics is the first part of this  
lecture Sometimes referred to ...
